

Meritor Parts

Meritor Parts - The Meritor Company is a leading international supplier founded upon one hundred years of custom of quality and service. Meritor specializes in integrated systems with several modules and parts to the original machine manufacturers and aftermarket equipment in the industrial and transportation trades.

Meritor values the wishes of all their customers to ensure their success while priding itself in the company's unique energy and thinks this output of energy to be their competitive advantage in their worldwide operations. Meritor begins with a culture which values diversity of people and their broad thought processes. Operating in 19 nations and employing more than eleven thousand two hundred individuals, Meritor encourages innovation and collaboration amongst a team of knowledgeable professionals.

Meritor strongly believes in just employing future focused individuals. These top-caliber workers could quickly adapt to changing environments and freely demonstrate the level of commitment and performance necessary so as to attain results for the competitive market environment. The business empowers their teams to make sound business decisions in order to enhance the overall success of the company. In return, Meritor offers their staff different chances for professional and personal growth.

The Advanced Engineering team is on the forefront of systems engineering and components. This consists of drivelines, axles, suspension and braking systems used for medium and heavy duty trucks, off-highway vehicles, buses, military vehicles and trailers. The Meritor Advanced Engineering team is developing. They opened a new technical center in Bangalore, India in September 2009 so as to lead their advanced product development initiatives that represent the whole Asia Pacific region. This team is also responsible for supporting the needs of all their global engineering employees.

Meritor's dynamic and customer focused Quality team is devoted to ensuring optimum processing at their production plants and aftermarket distribution facilities which are located around the globe in 19 nations and in 5 different continents.

The supplier development network is specially situated to be able to support new business growth. Regional teams are supported by global centralized specialties, initiatives and quality systems in Six Sigma and Materials Engineering. Meritor's growing Six Sigma program encourages a data-driven, fact-based method to decision making within every part of the business. The DFSS or Design for Six Sigma ensures product reliability within each region. The team is also included transactional Green Belts who use Six Sigma tools to business processes and implement lean methods.
