

Clark Forklift Parts

Clark Forklift Parts - At this time, there are over 350,000 Clark lift trucks performing worldwide, and upwards of 250,000 operating in North America alone. With five major lines across the world, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 distinctive makes of forklifts, with components covering more than 120,000 particular items for all of its automated equipment. Your regional Clark Seller is your complete source for availability of all your parts needs supplied by Clark Totalift.

Clark has a phenomenal Parts Supply team. The components warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to ensure exceptional service to both their customers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing producers. Motivated to supply the highest level of value and service to our users, Clark remains on the leading edge when it comes to enhancing efficiency and benefiting performance.

Worldwide, Clark has one of the most impressive supplier support networks. With over 550 locations globally, seller representation in over 80 countries and 230 locations in North America, their high level of dedication to their consumers predominates the materials handling industry.

Clark proudly remains an progressive leader of the material handling industry, pioneering safety features such as the operator restraint system. This exceptional commitment to safety is currently a customary feature on every forklift.

Clark's recurrent mission to possess the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck producer across the world to be certified with the globally accepted quality standard ISO 9001 for every one of their production facilities. Additionally, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any environmental restrictions, thus placing them in a prevailing industry position.

Clark has preferred the extremely economical and beneficial structure of "Lean Manufacturing" for its assembly facilities and application of resources. This structure was developed to acknowledge the most efficient method of production facility management and ensuring maximum efficiency. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

Clark's product engineers and suppliers communicate together to upgrade the proficiency and brilliance of their products while minimizing expenses. The new value engineering program combines modern product development and delivers improved customer support and service within the industry.
