

JLG Forklift Part

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV expedition. After spending numerous years establishing his family built crane business with his brother, John had no idea that this journey would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road trip.

While on their trip, John spent time talking to previous business acquaintances whom the Groves stopped to see along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John uncovered a vast marketplace for a product that could quickly and securely elevate people in the air to accomplish upkeep and other construction functions.

Upon returning from their travels, John formed a partnership with two friends and acquired a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty workers, they built and sold the first JLG aerial work platform. The company incorporates some of the basic design elements of that original lift into existing versions.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fateful cross-country journey and since the first JLG aerial platform entered the market. As of today, the company has expanded itself into quite a few global markets and continues to cultivate contemporary machines to guarantee that consumers are able to become safer and more well-organized within their workplace.
